GIRISH MALLYA

(352) 888-3849 | girishm60@gmail.com | github.com/girishmallya123 | Seattle, WA

EDUCATION

University of Florida, Gainesville, FL — May 2023
Master of Science in Computer Science (GPA 3.92/4)

CORE SKILLS

Programming Languages:	Python, Golang, Java, TypeScript, JavaScript, Kotlin
Web Technologies:	RESTful APIs, gRPC, Java Reactive Programming
Cloud Technologies:	AWS (SQS, Lambda, EC2, S3, API Gateway, CloudFormation), CircleCI, CDK
Databases:	MySQL, Amazon RDS, DynamoDB, Redis
Frameworks:	Ruby on Rails, Flask, Serverless, ReactJS
Software / Tools:	Git, Kubernetes, CI/CD, Docker, Headless CMS, FFMPEG

PROFESSIONAL EXPERIENCE

Microsoft (CoreAI), Redmond, WA — May 2026 – Present
Software Development Engineer 2

- Software Engineer in the 1ES team

Amazon (PxT), Seattle, WA — March 2025 – May 2026
Software Development Engineer 2

- Architected and launched an event-stream–driven LLM chatbot using Amazon Bedrock, EventBridge, and Lambda, reducing perceived latency by **64%** and scaling to **10M+ daily requests** across Amazon's corporate user base.
- Architected a new Release Notes system supporting **20+ partner teams**, implementing a React frontend, service-backed APIs, and a **headless CMS–driven authoring workflow** to streamline content creation. Built automated translation pipelines covering **32 Amazon languages**, and added semantic vector search, keyword search, and date-range filters for efficient multilingual discovery.

Amazon Web Services (AWS), Seattle, WA — June 2023 – March 2025
Software Development Engineer

- Designed and implemented scalable backend services for a global hardware intake platform spanning **200+** AWS data centers, processing **500K+** hardware units quarterly.
- Developed an automated test framework using synthetic data and self-cleaning routines, boosting CI/CD pipeline reliability and reducing failures by **30%**.
- Architected and delivered a new optical-hardware fulfillment service optimizing routing & inventory placement, reducing annual hardware waste by **$2B+**, with integration across 10+ upstream and downstream systems.

Software Development Engineer - 1 (Internship) — May 2022 – July 2022

- Delivered a backend automation tool to migrate legacy customers to microservices, reducing manual operations.
- Designed service architecture and implemented infrastructure as code using AWS CDK and CI/CD practices.

Amagi Media Labs, Bangalore, India — July 2019 – Aug 2021
Software Engineer - Enterprise Cloud Engineering

- Built and maintained distributed services for Amagi Cloudport, a cloud-native broadcast platform used by 300+ global customers.
- Designed a priority-based data purging algorithm, reducing cloud storage expenses by 60%.
- Created a fault-tolerant, serverless media ingestion pipeline using AWS Step Functions, Lambda, and S3, generating $1.4M+ in annual revenue.

ACADEMIC PROJECTS

Concept Hierarchy Tree [Python, Flask] — June 2019

- Designed a data structure that stores data in a hierarchical manner by ranking items in an abstract tree.
- Clustered items into different levels on the tree based on their similarity to a given input node.
- Developed a ranking system using *Cosine Similarity* and *Jaccard Index* to find "likeness" among items.
- Built a recommendation system by using the *Concept Hierarchy Tree* on data scraped from Amazon listings.

ACHIEVEMENTS

- **Winner of UF AI Days hackathon 2022 sponsored by NVIDIA** - Received the most popular prize for building an AI bot supporting sustainable development of the world using NLP. (*Top 1 among 200 entrants*)
